## Fullstack Software Engineer

Frontend-heavy Full Stack Software Engineer, 2 years of experience. Experienced with Vue, Nuxt, React, Next.js, Express.js, Python. Have worked with US-based SaaS client. During this time, proactively researched 3rd-party integrations for Product team to make decisions and semi-automated documentation process. Seeking to leverage my skills to provide value and hone them to become a better full stack engineer.

### SKILLS

**Frontend:** Vue, Nuxt.js, React, Next.js, Jest, Tailwind CSS

**Backend:** Node.js, Express.js, Python

**Others:** GitHub, Scrum, Jira

**Spoken Languages:** Native Spanish, Full-professional English

### WORK EXPERIENCE

**Gorilla Logic** • Costa Rica • Remote • 07/2021 - 03/2023

#### Consultant Frontend Engineer

- Streamlined documentation process for 50+ third-party integrations, saving 2 hours per week. Turned hours of manual documentation into executing a Go program and a copy-paste.
- Enhanced DSU ceremony by developing rotation system with Google Sheets, Python, and Slack Bot, resulting in improved team collaboration and 60% faster facilitation.
- Successfully executed as frontend feature lead, earning praise from team.
- My day to day: improve and maintain client's front-end via Vue 2, Vuex, Vue test utils, and Jest. Committed code via GitHub PRs.
- Advanced from intern to associate and finally consultant. Consultant was my latest role.

### EDUCATION

#### BS in Computing Engineering

Tecnológico de Costa Rica • 02/2017 - 09/2021

### PROJECTS

#### CABYS Tool

##### Personal Project

[A tool to query Costa Rica's product category tax rates.](#)
